

Chris Kopec, PE, LEED AP

Chris is a licensed mechanical engineer with more than 24 years of experience specializing in strategic HVAC solutions with a focus on energy efficiency and lowering equipment lifecycle costs. Chris is a LEED AP and has instructed LEED-accredited classes for MJ office staff.

Chris is MJ's COVID Mitigation Strategist, responsible for educating MJ staff and providing guidance to airports on fast-track pandemic mitigation improvements.

As McFarland Johnson's Director of Facilities, Chris leads our targeted efforts to provide for the seamless incorporation of sustainable principles into HVAC systems for airport, medical, institutional, and other commercial facilities.

Chris works closely with all design disciplines to overcome aesthetic challenges without compromising system efficiency or function.
