

## Aviation Bio

Curtis I. Grieveson, PE has spent more than twenty years working in and around airports, helping deliver major aviation projects and supporting the teams that bring them to life. As a Vice President and Principal within AECOM's Buildings + Places business, he contributes to aviation strategy, client coordination, and the successful execution of complex improvements across a range of airport authorities.

Over the course of his career, Curtis has been involved in important terminal and airfield initiatives—from expansions and secure-area enhancements to passenger experience upgrades and multi-disciplinary infrastructure work. He regularly collaborates with industry partners, participates in aviation leadership discussions, and stays closely connected to the challenges and opportunities facing airport clients today.

Curtis remains committed to improving how airports function, how travelers move through them, and how facilities adapt for the future. His work reflects a steady focus on thoughtful leadership, strong client relationships, and deep technical understanding of the aviation environment.
