

Steve Moody

Vice President of Business Development

CrowdVision, Inc.

www.crowdvision.com

Steve is a business development veteran with 25+ years of experience in promoting concessions and IT services to airports. Steve currently works for CrowdVision, a company which analyzes people movements in TSA checkpoints and other crowded areas in airport terminals. Using a variety of sensor technologies and a software platform consisting of Artificial Intelligence and machine learning, CrowdVision can accurately track queueing wait times, fill levels, pedestrian counts and yes – social distancing in key airport terminals. CrowdVision is the largest supplier of motion analytics in the airport industry with 13 major airport deployments in the United States and 33 airports worldwide. Major airport clients include – London Heathrow, Tokyo Narita, Miami International, Orlando, BWI, Indianapolis, Phoenix SkyHarbor, Denver, Chicago O’Hare and Charlotte Douglas International Airport. Crowdvision is also a supplier of motion technology to industry giants SITA, Amadeus, Delta Airlines, United Airlines and Infax.

Prior to CrowdVision, Steve started his airport career in 1994 with Ackerley Airport Advertising and has since worked for JCDecaux, Corey Airport Services and most recently Lamar Airport Advertising. Steve has a keen understanding of the challenges and nuances of operating in the airport environment and is skilled at creating successful airport partnerships.
